MANUFACTURER-BASED PURCHASE

World leader in manufacturing architectural building materials that include: Expansion Joint Covers, Architectural Louvers, Sun Shades, Screens, and Explo Vents.

A premier provider of unique metal surfaces, systems, and solutions. They specialize in fabricating with aluminum to create unique and visually dynamic architectural products that contribute to LEED Credits.

DISTRIBUTION-BASED PURCHASE

Carlisle waterproofing solutions are known for their durability, longevity, and effectiveness in protecting structures from moisture damage, making them a popular choice for various construction projects, including roofing, foundations, and below-grade applications.

Vertical and Horizontal Waterproofing. Fluid applied, sheet membrane, blindside waterproofing, Bentonite Clay, and Green Roof Systems for complete building envelope protection. Fluid applied and sheet Air and Vapor Barriers for vertical exterior wall assemblies. NFPA 285 Fire Resistant. Both Vapor Permeable and Non-Permeable products.

Alchemco Integral Concrete Waterproofing is a specialized solution designed to enhance the durability and water resistance of concrete structures. Commonly used in various construction applications, including foundations, new and existing concrete structures including Parking Garages, Bridges, Water-Waste Water Treatment Plants, and other concrete structures. This approach provides a seamless and effective means of safeguarding concrete structures from water-related deterioration.

A variety of labor and material warranties are available to suit both project and expectations.
